A MESSAGE FROM THE EDITOR

FROM THE DESK OF

BRIDGING THE GAP IN HEALTHCARE

by Amanda Platt, RN BSN

Care Partners Home Care was built on three core values of love, compassion and empathy. Our values are what lead each and every one of us in the mission to providing deep meaningful relationships by creating environments that heal. By focusing on true person-centered care, we will improve the quality of life for anyone who needs our care. We hope you enjoy embarking on our journey, reading stories from the desks of our in-office staff who connect with our caregivers and clients each and every day. Learn about our "WHY".

From the Desk of Stephanie S.

Executive Administrative Assistant

Stephanie was starting her Thursday morning, when an over joyous phone call came in to the main line. One of our sweet clients' was calling with amazing news, that she **"absolutely loved the caregiver"** (CG) we sent to her home. It was brought to our attention that our CG went **"above and beyond"** the call of duty and made our client feel **"special"**. Our CG took the time to hand paint her clients nails, making her client feel young and full of memories; **"It has been decades since my nails have been painted. I feel beautiful"**. This specific CG had been hired on staff with Care Partners 19 days prior to working with this client. In just 19 short days our CG had touched the lives of 14 different clients including the client who called Stephanie Thursday morning. This small act of love, compassion and empathy from our CG brought a smile to woman's face who needed it and full-filled the reason why our caregivers do what they do each and every day. While this shift was intended to be only a few short hours, by request of the client our CG returns each week to continue these special moments that make an impact in her life. **This is our WHY.**
